

Medical education center Genetics
Job Opportunities Faculty Member

Yokohama City University invites applications for a faculty position in the field of genetics, responsible for both research and teaching.

The Department of Genetics at our university is conducting leading research, both domestically and internationally, to elucidate the genetic causes and molecular pathology of hereditary and rare and undiagnosed diseases. Additionally, we play a key role in supporting the foundation of data interpretation and other aspects of genomic medicine at the Medical Genome Center of Yokohama City University Hospital.

We are seeking an individual with broad expertise in genetics who can contribute to education (mainly in general education and basic science courses) and research at the Center for Medical Education. The successful candidate is also expected to actively engage in student education at both the undergraduate and graduate levels in the School and Graduate School of Medicine, and to promote high-quality research within the Department of Genetics.

Department	School of Medicine and Graduate School of Medicine
Position Title	Assistant Professor
Number of positions	1
Subject Areas of Teaching Responsibility	Education and research in the field of Genetics Education at the Medical Education Center (mainly general education, basic subjects, etc.)and research
