↑ Our group's research proposal

# Introduction to clinical medicine at the bedside(7/31~8/9)

- Learn about clinical skills
- CPR, X-Ray, ECG, Percussion, Auscultation, Intubation etc
- Lectures in the morning
- Practice in the afternoon

# Children's Hospital tour (2017/8/2)

Use color bandage  
for children

# What I could do and learn in this program

- Learned what is it like to make clinical reserch plan
- Learned the basics of clinical skils
- Got to used English medical terms
- learned medical situations in other countries

# messages for future students

- I strongly recommend this program for the students
  - not good at English
  - want to study abroad
  - want to communicate with other countries' medical students
- Required medical knowledge was not so difficult
- My English ability was not good, but I could learn many things
- If you are interested in this program, I want you to try positively.

# Acknowledgements

- I would like to thank all the staffs, doctors, and medical students in this program and YCU who kindly supported my visit, especially Ms. Ami Ishii, Prof. Tomio Inoue, Akihide Ryo and Ran Goldman.
- This program was supported by GUSHINKAI and KOUENKAI, School of Medicine, Yokohama City University

# Thank you for your listening!
